All clinical staff meet requirements by The Department of Mental Health.

Although we offer a variety of programs and services that have very specific goals, in all programs **we believe in the healing power of collaborative and empowering relationships**. We know that “therapeutic relationship” is one of the most important components of successful services. Our practice of **acceptance, respect, and compassion** toward all, fosters the level of openness and honesty needed for personal healing and progress. Our goal is to build a positive relationship with those we serve beginning at the time services are started and to maintain this relationship throughout each person’s journey with us.

**Hope**  
lives **here.**
